

###001

Describe the trends and main directions of the development of higher education in the modern world

###002

Systematize the paradigms and normative documents of education

###003

Describe the role of higher education pedagogy in the system of sciences

###004

Expand the essence of the concept of "Continuous education system"

###005

Explain the importance of pedagogical forecasting and design in higher education

###006

Analyze active learning methods in training future specialists

###007

Describe the aims and objectives of practical and seminar classes in high school

###008

Describe the structural elements of a student's individual work in high school

###009

Give a definition of the Bologna Process and the integration of educational systems in the modern world

###010

Identify the realm of science that are in continuity with the pedagogy of higher education and reveal the essence of their relationship

###011

Analyze the degree of implementation by Kazakhstan of the Bologna Process the criteria (basic, optional, recommendatory): progress, achievements, problems and plans for the future

###012

List the main features of teaching university students for academic mobility

###013

Compare the distinctive features of traditional and humanistic educational paradigms

###014

Describe the essence and specifics of the dual learning system

###015

Describe the new reforms of the strategic goals and objectives aimed at the development of education in Kazakhstan

###016

Characterize the relationship between a teacher and a student of the university and their research activities

###017

Describe the structure of the educational process in higher education

###018

Specify the properties and qualities, abilities of a lecturer, affecting the efficiency of lecture

###019

List the main components of the content of higher education

###020

Systematize the advantages and disadvantages of the distance education system

###021

Define the goals and objectives of the work on accreditation, state certification of educational institutions

Блок 2

###001

Explain the role of works and educational ideas of I.Altynsarin and A.Kunanbayev in the theory and practice of modern domestic pedagogy

###002

Analyze and formulate modern forms and types of education, institutions, depending on the composition of students

###003

Analyze the features of the educational process at a university based on credit technology

###004

Define and characterize the main categories of higher education pedagogy

###005

Analyze the research scope and object of higher education pedagogy

###006

Formulate the aims and objectives of higher education pedagogy

###007

Expand the essence of the modern education system of the Republic of Kazakhstan in terms of development prospects, new directions and programs

###008

Identify the modern requirements for lecture analysis

###009

Systematize and characterize research methods in higher education pedagogy

###010

Analyze topical issues of training pre-service teachers for professional and pedagogical activities

###011

Describe the methods and means of teaching in higher education

###012

Describe the features of the modern educational process management in higher educational institutions

###013

Describe the learning process, the essence and its structure, the driving forces of the learning process

###014

Explain the importance of students socialization in higher education

###015

Analyze the personality of higher education teacher and the requirements for his/her qualifications

###016

Formulate the communicative competence and culture of a higher education teacher

###017

Show the connection of higher education pedagogy with other sciences

###018

K.Zhubanov Aktobe Regional University in the modern educational space. Analyze the role of K. Zhubanov Aktobe Regional University in the training of pedagogical personnel (educational programs «Pedagogical Sciences»)

###019

Analyze and indicate the directions and features of modern educational work in higher education

###020

Monitoring the results in higher education and its functions. Analyze and formulate the forms of pedagogical control of knowledge

###021
